PHILIPS

sense and simplicity

Highlights

Premium metal housing

Housed in superior metal, these earphones are shielded from unnecessary vibration for accurate sound transmission, resulting in smooth bass response and clear mid-to-high range tones.

For deepest and richest bass

Turbo Bass air vents allow air movement for high-fidelity reproduction of the deepest and richest bass.

Precisely tuned acoustics

Perfect in-ear seal of these earphones surprises you with exceptional noise isolation.

For best sound at low volume

You don't have to turn up the volume in noisy places anymore. Angled Acoustic Pipe and the perfectly sealing earbuds cut off background noise significantly, delivering the same quality sound at lower volume and a longer battery life.

Uniquely curved design

A unique curved headphones housing design, enables easy grip and makes it easy to get perfect in ear fit - even on the go.

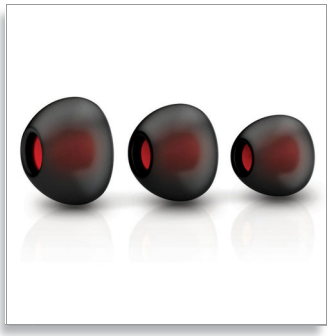
Soft memory foam cushions

Ultra soft memory foam cushions perfecty shape around the contours for your ears. This gives you the best fit while you hardly feel them.

Ear fitting design

The design superiority of a slight 15-degree tilt in the Angled Acoustic model based on the anatomy of the human ear achieves a natural fit and supreme comfort.

3-size ultra-soft silicon caps



The 3 sizes of ultra-soft silicon caps of these Philips earphones sit comfortably in your ears without adding pressure to them whilst blocking out unwanted noise.

Anti-tangle fabric cable

Textile covered cable prevents cable tangling, is very long-lasting and extends the product life.

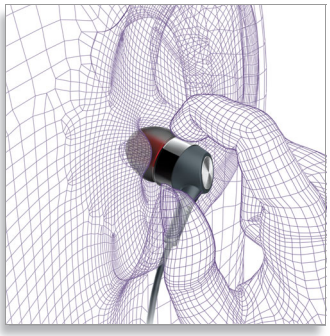
Anti-tangle slider

When storing your headphones there is a risk that the cables tangle if not stored carefully.This makes it a hassle to store the headphones and get them ready for listening. Simply slide the anti-tangle slider towards the earpieces to keep the two earpiece cables neatly together, and to minimze the risk of the cables tangling.

1.2m cable

The ideal cable length to give you the freedom to put your audio device where you want.

Flexi-grip design



The soft flexi-grip material that the body of the headphone is sheathed in enhances its performance and extends its durability. It protects the cable connection from damage that otherwise could occur due to repeated bending of the headphone body from frequent contact with the user's fingertips when being put on and removed.
